Summary

- 2.5+ years of hands-on experience in software development and product management.
- Software design, testing and development experience in C#, Java, JavaScript, MERN stack.
- Demonstrated leadership through product management, agile methodologies, and cross-functional collaboration.
- Enhanced communication, teamwork, analytical and problem-solving skills while working collaboratively with project teams, colleagues and clients.

Technical Skills

- Languages: C#, .NET, Java, C, C++, JavaScript, Python, SQL, PL/SQL, Shell Scripting, Kotlin.
- **Databases**: MySQL, PostgreSQL, SQL Server, Firebase, NoSQL MongoDB.
- Frontend: HTML, CSS, Bootstrap, ReactJS, Tailwind CSS, Material UI, WordPress, Adobe XD, Figma.
- Frameworks: Spring boot, Flutter, Django, NextJS, NodeJS, ExpressJS, Junit.
- Data Analytics and Data Visualization Tools: MS Office, Power BI, Tableau.
- Cloud & DevOps: AWS, Docker, Kubernetes, API Gateway.
- **Developer Tools:** Eclipse, Android Studio, VS Code, Visual Studio, Jetbrains, Apache Tomcat, Wamp, JIRA, Postman, Git, GitHub, Trello, Confluence, Asana, Bitbucket, Notion, Salesforce, Miro, Notion, Zendesk
- **Software Methodologies**: Agile, Scrum, Software Development Life Cycle (SDLC), Iterative, Design Techniques, Project Management Methodology.

Experience

Product Manager Co-op

Oct 2024 - Present

Ingenico • Mississauga, ON, Canada

Tech Stack: Salesforce, Miro, Notion, Confluence, JIRA, MS Office, Zendesk

- Collaborated with cross-functional teams and PMs/POs to gather and analyse requirements for a new product.
- Proposed an optimized solution to the product lifecycle, reducing the Service Level Agreement (SLA) by 50%.
- Conducted system analysis and benchmarking of different market and company's own products to identify feature and process gaps.
- Performed user research and focus interviews, identifying critical improvement areas and collecting feedback of existing products.
- Defined and documented Epics, Use Cases and PRDs and developed dashboards for new product initiatives.
- Contributed to the design process by providing input and feedback to create mock-ups and prototypes.
- Conducted budget planning for development efforts, estimating costs, resource allocation, and developer hours to streamline product deliver.

Software Developer

Jan 2022 - Jun 2023

Panim Technology • Ahmedabad, India

Tech Stack: C#, .NET, ReactJS, NoSQL, MySQL, RPA, Postman, AWS, Docker, Kubernetes, MS Office.

- Developed Auction Management System, a web application with the ability to authorize, validate and manage bidders and sellers, manage car data, and generate valuation for it using C#,
- Used RPA for Automating processes on Website using UIPath and documenting the procedures.
- Utilized ReactJS for frontend development, for giving an appealing look and customer friendly user interface.
- Modified and optimized existing systems which increased the performance and reduced the time taken by 50%.
- Implemented CI/CD for streamlining operations by migrating database to AWS S3.
- Employed Postman to test and validate the functionality of REST APIs, seeking proper alignment between frontend and backend components. Automated test cases for unit and integration testing.
- Developed comprehensive technical design documentation (TDD) to provide clear insights into the code structure and Implementation details.
- Provided in code review and feedback to other developers to improve code quality.

Android Developer Intern

Cloud Counselage • Mumbai, India

Tech Stack: Android, Java, Kotlin, Adobe XD, Firebase, Android Studio, Tableau.

- Created prototypes and mockups using Adobe XD to create an interactive prototype and preview app behavior.
- Implemented Android applications using Java and Kotlin and integrated with web services and APIs to improve application performance.
- Implemented user authentication, including user role management and mobile number verification using Firebase.
- Conducted comprehensive testing on various mobile devices to ensure compatibility across platforms, ensuring a consistent user experience.
- Generated 100+ test cases and implemented regression testing methodologies to verify that code changes and updates did not negatively impact existing features.
- Incorporated data analysis and visualization using tools like Tableau to provide stakeholders with actionable insights and trends, optimizing decision-making processes.

Education

Master of Applied Computing | GPA - 3.6/4.0

University of Windsor • Windsor, ON, Canada

Sep 2023 – Apr 2025

Dec 2020 - Jun 2021

Bachelor of Engineering (Computer Engineering) | CGPA - 8.9/10.0

Jul 2018 - May 2022

Gujarat Technological University - L.D. College of Engineering • Ahmedabad, India

Extracurricular Activity

Volunteer Jan 2016 - Present

BAPS

- Organize and manage large scale public events.
- Provide technical support, manage technical settings, and operate audio visual for events and programs.
- Monitor and maintain organization database.

Chairperson Jul 2021 - May 2022

Innovator Club

- Led and managed planning and execution of club's technical events.
- Conducted seminars and webinars to educate and prepare students for competitive coding competitions and hackathons.
